SUMMARY

Results-driven Agentic AI Developer and Data Analyst with experience in enterprise IT, power utility, and e-commerce domains. Proficient in Python, SQL, Power BI, ETL pipelines, LLMs, LangGraph, and multi-agent AI systems, with expertise in building AI-powered workflows, predictive machine learning models, and data-driven solutions. Passionate about combining AI agents with analytics to automate decision-making and solve real-world business problems. Pursuing a B.Tech in Computer Science (AI/ML) at VIT Bhopal, graduating in May 2027.

TECHNICAL SKILLS

Languages & Databases: Python (Pandas, NumPy, Scikit-Learn), TypeScript, JavaScript (Node.js), SQL (MySQL, PostgreSQL, T-SQL), MongoDB, ChromaDB (Vector DB)

Data Analytics & BI: Power BI (DAX, Power Query), Tableau, Excel (Power Query, Pivot Tables), ETL Pipelines, KPI Development

AI & LLM Engineering: LangChain.js, LangGraph, GPT-4o API, Prompt Engineering, Multi-Agent Systems, RAG, Embeddings

Backend & DevTools: Express.js, REST APIs, Mongoose, Docker, Docker Compose, Git, GitHub, Railway, VS Code, Postman

Core Competencies: Data Warehousing, Medallion Architecture, Dimensional Modeling (Star Schema), EDA, A/B Testing, Query Optimization

EXPERIENCE

Data Analyst & ML Intern

May 2026 – Present

CESC Rajasthan, RP-Sanjiv Goenka Group

Rajasthan, India

- Trained and evaluated a short-term load forecasting model using Python (Scikit-Learn, XGBoost) to predict hourly substation electricity demand, achieving a **96%** forecasting accuracy rate.
- Processed raw time-series consumption data from **10K+** smart meters using Pandas and NumPy, conducting exploratory data analysis (EDA) to detect grid anomalies and potential revenue leaks.
- Visualized substation load distribution and active vs. reactive power by building interactive Power BI dashboards, enabling senior engineers to identify **3** critical grid bottlenecks.
- Streamlined database query scripts to aggregate daily energy distribution logs, reducing reporting pipeline execution times by **30%**.

Data Analyst Intern

Apr 2025 – Jun 2025

Thrillophilia

Remote, India

- Analyzed **15K+** customer feedback and booking records using Python (Pandas) and SQL, identifying key package rating trends to optimize travel itinerary listings.
- Developed operational Power BI dashboards to track regional sales performance and customer satisfaction metrics, saving **4+ hours** of manual compilation weekly.
- Queried relational databases using PostgreSQL to extract weekly operational metrics for business teams, reducing ad-hoc data request turnaround time by **25%**.
- Cleaned and validated messy booking datasets containing missing fields and duplicate entries, improving data pipeline accuracy for the downstream marketing team by **15%**.

PROJECTS

Retail Analytics Pipeline — Python, Pandas, Matplotlib, openpyxl | GitHub

Feb 2026

- Engineered a scalable pipeline processing **32.4M+** records from 3 heterogeneous sources, reducing memory footprint by **65%** via dtype-level optimization.
- Designed a repeatable data-cleaning framework that resolved anomalies across **32M+** records, reducing data-cleaning cycles by **50%** with automated audit trails.
- Formulated 13 business KPIs including INR 818 Cr revenue and 32.44% gross margin, identifying 2 departments driving **44%** of total revenue.
- Scored 206K+ customers on RFM dimensions, identifying a Champions cohort with **10x** higher spend and flagging 24K+ at-risk customers for re-engagement.

SQL Data Warehouse & Analytics Pipeline — SQL Server, T-SQL, SSMS, Git | GitHub

Jul 2026

- Architected a 3-layer Medallion data warehouse in SQL Server, automating ETL pipelines to ingest and cleanse raw

CRM/ERP data and reducing data latency by **40%**.

- Constructed star-schema dimensional models, writing **15+** optimized stored procedures, CTEs, and window functions in T-SQL.
- Optimized analytical SQL queries using indexing and query tuning, reducing query execution times by **40%** with version control via Git.

AI Competitive Intelligence Agent — *LangChain.js, LangGraph, GPT-4o, Node.js, Express.js, React.js, Next.js, MongoDB, ChromaDB, Docker* Jun 2026

- Orchestrated an autonomous multi-agent system using LangGraph and GPT-4o, automating competitor tracking across **10+** sources and capturing **50+** daily data points.
- Deployed a self-updating RAG pipeline using ChromaDB and OpenAI Embeddings, improving semantic retrieval accuracy by **25%**.
- Integrated Tavily Search and Slack APIs to deliver automated briefings, reducing manual intelligence gathering by **15+ hours** weekly.
- Created a React/Next.js dashboard for real-time tracking, implementing an evaluation framework that achieved **94%** retrieval precision.

EDUCATION

VIT Bhopal University
B.Tech, Computer Science and Engineering (AI & ML) | CGPA: 8.63/10

Aug 2023 – May 2027
Bhopal, India

Relevant Coursework: Data Structures & Algorithms, Database Management Systems (DBMS), Statistical Methods, Machine Learning, Data Mining, Python, Operating Systems, Cloud Computing

CERTIFICATIONS

- | | |
|---|------|
| • Google Data Analytics Professional Certificate (Coursera) — Data Analysis, SQL, Tableau, R | 2026 |
| • Data Science Bootcamp (Krish Naik) — Python, Machine Learning, EDA, Feature Engineering | 2025 |
| • Applied Machine Learning in Python (University of Michigan) — Scikit-learn, Model Evaluation | 2025 |
| • Cloud Computing (NPTEL, IIT Kharagpur) — Cloud Architecture, GCP, Distributed Systems | 2025 |
