| Bhopal, India

Professional Summary

Results-driven **Data Analyst** with proven internship experience translating large datasets into actionable business insights. Proficient in **SQL, Python, Power BI, and Excel**, with an academic foundation in **Artificial Intelligence & Machine Learning**. Experienced in end-to-end analytics workflows — data ingestion, cleaning, dashboard delivery, and stakeholder reporting. Seeking full-time **Data Analyst / Business Analyst** roles to drive data-informed decisions and measurable business impact.

Education

Vellore Institute of Technology (VIT) Bhopal University	Bhopal, MP
<i>B.Tech — Computer Science & Engineering (AI & Machine Learning) — CGPA: 8.63/10</i>	<i>Aug 2023 – May 2027</i>
St. Anne's School (CBSE)	Bhopal, MP
<i>Senior Secondary — Class XII — 83%</i>	<i>2023</i>
<i>Secondary — Class X — 90%</i>	<i>2021</i>

Technical Skills

Languages & Query:	Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, openpyxl), SQL (MySQL, PostgreSQL), R (basic)
BI & Visualisation:	Microsoft Power BI (DAX, Power Query, RLS), Tableau Public, MS Excel (Pivot-Tables, VLOOKUP, Macros)
Data Skills:	ETL Pipelines, EDA, Data Cleaning & Wrangling, RFM Segmentation, KPI Development, Statistical Analysis, A/B Testing, Forecasting
Databases:	MySQL, PostgreSQL, Google BigQuery, MongoDB (basic)
Tools & Platforms:	Git & GitHub, Jupyter Notebook, VS Code, Google Colab, Google Cloud Platform, MS Office Suite
Soft Skills:	Data Storytelling, KPI Reporting, Stakeholder Communication, Problem Solving, Collaboration

Work Experience

Data Analysis Intern – IT Department	May 2026 – Present
<i>CESC Rajasthan, RP-Sanjiv Goenka Group</i>	<i>Rajasthan, India</i>
- Performing data analysis and reporting for the IT department of CESC Rajasthan (RP-Sanjiv Goenka Group) — handling operational datasets, building structured reports, and supporting data-driven decision-making across department workflows. - Developing Excel and Python-based analysis pipelines to process internal data, track key operational metrics, and surface trends for IT management review. - Collaborating with cross-functional teams to gather data requirements and deliver ad-hoc analytical reports within tight turnaround timelines in a large-scale enterprise environment.	
Data Analyst Intern	Apr 2025 – Jun 2025
<i>Thrillophilia</i>	<i>Remote, India</i>
- Analysed 100K+ rows of booking and customer behavioural data using Python (Pandas, NumPy) and SQL, uncovering top-performing travel packages contributing to a 12% projected uplift in conversion rate. - Designed and deployed interactive Power BI dashboards tracking revenue trends, regional performance, and customer drop-off funnels — reducing manual reporting time by 40%. - Executed RFM customer segmentation enabling the marketing team to personalise re-engagement campaigns and improve repeat-booking targeting by 18%. - Conducted A/B test analysis on two landing page variants; delivered statistical reports (p-value, confidence intervals) that directly informed a UX redesign adopted by the product team. - Automated weekly KPI reporting via Python scripts + Excel Power Query, saving 6+ hours/week of manual data consolidation.	

Projects

Retail Analytics Pipeline | *Python, Pandas, Matplotlib, openpyxl*  **Feb 2026**
github.com/razzakshat/data-analyst-projects

- Processed **32.4M+** records across 3 data sources; optimised memory usage by **65%** through dtype reduction to handle large-scale data efficiently without infrastructure overhead.
- Built a **repeatable data cleaning pipeline** resolving nulls, duplicates, whitespace, and empty strings across all 3 datasets; findings documented in a structured **data quality report** for audit and reproducibility.
- Computed **13 KPIs** including 818 Cr revenue and 32.44% gross margin; identified top 2 departments driving **44% of total revenue** — enabling data-backed category prioritisation.
- Segmented **206,209 customers** via **RFM scoring** — Champions cohort shows **10× higher spend** than Lost segment; flagged **24,123 At-Risk customers** as highest-ROI re-engagement opportunity.
- Delivered **6 production-grade charts** and a **4-sheet formatted Excel dashboard** with conditional formatting and colour-coded segments for business-ready presentation.

Customer Shopping Behaviour Analysis | *Python, MySQL, Power BI, Power Query, DAX* **May 2026**

- Built an **end-to-end analytics pipeline** on 3,900 retail records — ingested raw CSV, performed data cleaning (null handling, type casting, deduplication) in Python, and loaded a normalised schema into **MySQL** for structured querying.
- Wrote **12 SQL business queries** using GROUP BY, CTEs, and window functions to surface revenue by category, repeat-purchase rates, and subscription vs. non-subscription spend differentials.
- Identified that **subscribed customers spend 18% more per transaction** on average — surfaced through cohort comparison query and validated across 3 product categories.
- Built a **multi-page interactive Power BI dashboard** using Power Query for ETL, DAX measures for dynamic KPIs (revenue trend, customer loyalty tier distribution, MoM growth), and slicers for gender, region, and subscription status.
- Dashboard adopted as a **self-serve reporting tool** — replaced 2 static weekly Excel reports and reduced ad-hoc query turnaround from hours to under 5 minutes.

Leadership & Extracurricular Activities

Core Member — Blockchain Club

Technical Division

VIT Bhopal University

Aug 2024 – Present

- Organised workshops on **on-chain data analytics** (Dune Analytics, Nansen); co-mentored 3 hackathon teams and delivered a research session on querying blockchain transaction data to a 60-member audience.

Core Member — National Service Scheme (NSS)

Community Outreach & Data Coordination

VIT Bhopal University

Aug 2024 – Present

- Managed attendance, logistics, and impact metrics for **500+ participants** using Excel dashboards; co-led a rural digital literacy drive across 3 village camps and reported findings to the faculty committee.
